

CHANRYLE JAY CAGARA

AI-NATIVE SYSTEMS DEVELOPER — FULL-STACK, AUTOMATION & AI INTEGRATION

Quezon City, Philippines | 0994 783 6988 | chanrylecagara@gmail.com
linkedin.com/in/chanrylejay | github.com/chanrylejay | chanryle-cagara.vercel.app

Systems developer who ships production platforms solo. Currently the sole developer of a live scheduling-intelligence platform for a US home-care agency — full-stack web application, CRM API integration with sanctioned production writes, AI pipelines, and SMS automation, all serving real daily operations. Built on 4+ years of operations, QA, and compliance experience, with an AI-assisted development workflow that turns one developer into a full delivery team: design, build, adversarial review, deployment, and verified releases.

TECHNICAL SKILLS

Full-Stack: Next.js 14 (App Router), React, TypeScript, Tailwind CSS, Node.js, Python, SQL

Backend & Data: Supabase (Auth, Row-Level Security, migrations), PostgreSQL, Neon, REST API design, audit-trail architecture, cron/scheduled functions

API Integration: OpenAPI 3.1 spec auditing, healthcare CRM (AxisCare) reads + production writes, OpenPhone SMS (10DLC, webhooks), Netlify API, webhook systems

AI Engineering: Claude (Code CLI, MCP, multi-agent orchestration), DeepSeek API production pipelines, grounded agents with output validators, prompt-system design

Automation & QA: n8n (production workflows, Telegram bots), Playwright end-to-end verification, adversarial code review workflows, Bruno API testing

Cloud & DevOps: Netlify, Vercel, GitHub, CI build discipline, deploy debugging, PowerShell/Bash

Operations & QA: Content moderation, trust & safety, quality auditing, SOP development, HIPAA-aware data handling

PROFESSIONAL EXPERIENCE

Devoted Care Services LLC | Systems Developer

Jun 2026 – Present | California, US — Remote

- Designed, built, and shipped a production scheduling-intelligence platform for a home-care agency (~120 caregivers, 4 schedulers) as the sole developer: coverage command center, caregiver–client matching engine, availability calendars, open-shift tracking, reports, and print-ready care forms.
- Integrated the agency's CRM (AxisCare) end-to-end from a 12,500-line OpenAPI specification — high-volume live reads plus the agency's first sanctioned production writes, shipped behind fail-closed kill switches, empirically verified on disposable data, and fully audit-logged.
- Built production AI pipelines: automated care-note risk triage (DeepSeek) on a 30-minute schedule, and a grounded AI assistant where every fact is tool-sourced and validator-checked — a zero-fabrication design for healthcare-adjacent data.
- Shipped SMS automation on OpenPhone with 10DLC registration: automated shift offers by text with inbound reply webhooks feeding scheduler dashboards.
- Implemented per-user authentication (Supabase Auth + Row-Level Security) and a system-wide audit trail; HIPAA-aware handling with local de-identification before any AI vendor sees data.
- Ran a client-approval delivery workflow: interactive HTML previews → per-item sign-off → batched deploys → Playwright-verified releases on production.

Accenture | Content Operations Specialist (App Review)

May 2025 – Jun 2026 | Philippines

- Evaluated 100+ complex digital application submissions daily against platform compliance standards, copyright law, and corporate policy.
- Maintained 100% accuracy metrics and exceeded productivity benchmarks — Top Performer recognition for 6 consecutive months.

Teletech Inc. | Customer Support Representative

Aug 2023 – Sep 2024 | Philippines

- Delivered technical troubleshooting and operational support, sustaining a 95%+ customer satisfaction rating.
- De-escalated complex account and system issues, reducing client complaints by 20%; improved response templates and documentation, raising workflow efficiency by 15%.

Alorica | Customer Support Associate

Jul 2022 – Jan 2023 | Philippines

- Resolved customer inquiries across voice and chat channels — technical troubleshooting, account security, and billing support.
- Logged interactions and tracked service tickets in CRM tools, maintaining accurate case documentation for quality and audit review.

Accenture | Administrative & Recruitment Coordinator

Mar 2021 – Dec 2021 | Philippines

- Coordinated end-to-end recruitment pipelines for 200+ global candidates; compliance documentation, background verification, and weekly stakeholder reporting.

FEATURED PERSONAL PROJECTS

ma, Ano Ulam? — Filipino Meal Suggestion Engine

Next.js 14, TypeScript, Tailwind, Neon PostgreSQL, DeepSeek API, Vercel Cron, pdf-parse

Live: ma-anoulam.vercel.app | GitHub: github.com/chanrylejay/ano-ulam

- Suggests the cheapest Filipino meals daily from real Department of Agriculture market prices — 47-recipe hardcoded cost engine (replaced unreliable AI-generated estimates with verified data), automated daily pipeline, zero AI calls per visit. Organically viral on Facebook (1,000+ likes, 300+ shares).

Shiny Gmail Automation — AI-Powered Email Classification

n8n, Gemini API, Neon PostgreSQL, Telegram Bot API

GitHub: github.com/chanrylejay/shiny-gmail-automation

- 3 workflows / 60 nodes / \$0 per month — classifies email into 7 labels and surfaces rules via Telegram; hardened through 11 rounds of adversarial code review.

n8n Project Calculator — Instant Pricing Estimator

React, TypeScript, Vite, Tailwind CSS, Vercel

Live: n8n-project-calculator.vercel.app | GitHub: github.com/chanrylejay/n8n-project-calculator

- Client-facing sales tool generating instant automation project estimates; built and deployed in one session with an AI-first workflow.

EDUCATION

Bachelor of Science in Information Technology

Quezon City University | Quezon City, Philippines | Graduated Jun 2020
